

BUSINESS ANALYST SKILLS ASSESSMENT

Created by Laura Brandenburg, ACBA, CBAP

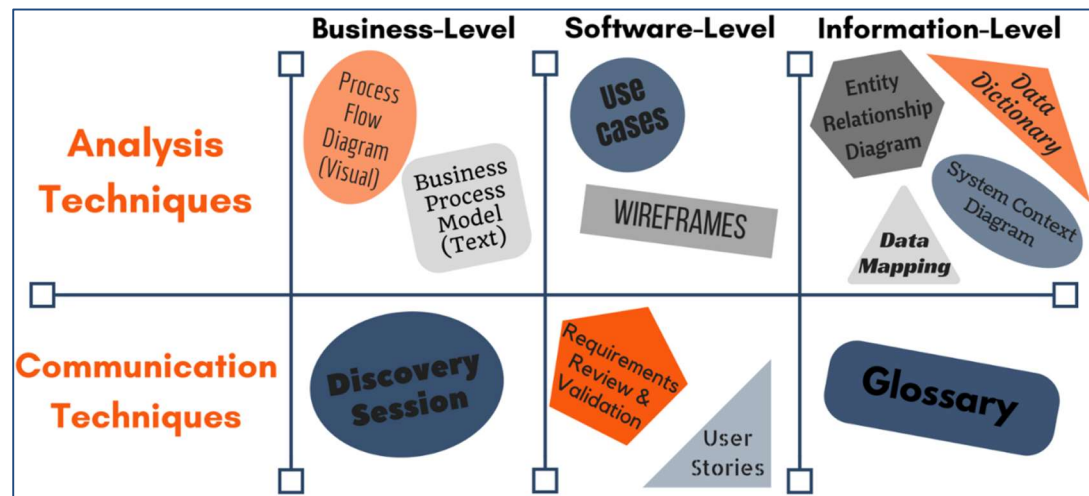

ABOUT THE ASSESSMENT

This assessment is designed for professionals looking to start business analyst careers and is intended to be used as a tool to help them clarify their level of awareness and experience of key business analysis techniques and processes and to make more informed decisions about training and career opportunities.

The first step is to complete the assessment, recognizing that some experience may have happened informally, outside a structured business analysis process. The second step is to identify training needs and a development plan.

ASSESSMENT PART 1: THE BUSINESS ANALYST BLUEPRINT®

The Business Analyst Blueprint® covers the core business analysis techniques that new business analysts use to discover, analyze, and communicate requirements on a typical business process or software change project.

ASSESSMENT OF EACH TECHNIQUE

Skill	Explanation	Related / Variant Terms	Level of Skill <ul style="list-style-type: none"> • Novice • Intermediate • Expert 	Formality <ul style="list-style-type: none"> • Informal • Formal
Process Models	Map out a high-level process and use clarifying techniques like swimlanes and decision points.	Process Maps, Workflow Diagrams

ASSESSMENT OF EXPERIENCE WITH EACH STEP OF THE BUSINESS ANALYSIS PROCESS

Skill	Explanation	Level of Skill <ul style="list-style-type: none"> • Novice • Intermediate • Expert 	Project Sizing <ul style="list-style-type: none"> • > 1 week • >1 month • 1-3 months • 3+ months 	Stakeholder Environment <ul style="list-style-type: none"> • 1-2 stakeholders • 3-5 stakeholders • 6+ stakeholders
1 - Get Oriented	Ability to discover what's needed to get started quickly, by clarifying the role, the project, and the existing system and process capabilities.			
2 - Discover the Business Objectives	Discover what's driving the project so you can ensure the scope addresses the true business need, or problem to be solved.			
3 - Define Scope	Gain agreement from the business and technology stakeholders on the project scope – or what will be accomplished within the project constraints.			
4 - Formulate BA Plan	Create a realistic and credible business analysis plan that includes deliverables, stakeholders, and timelines.			
5 - Define Detailed Requirements	Work through the detailed requirements deliverables and establish an iterative rhythm.			

Skill	Explanation	Level of Skill <ul style="list-style-type: none"> • Novice • Intermediate • Expert 	Project Sizing <ul style="list-style-type: none"> • > 1 week • >1 month • 1-3 months • 3+ months 	Stakeholder Environment <ul style="list-style-type: none"> • 1-2 stakeholders • 3-5 stakeholders • 6+ stakeholders
6 - Support Technical Implementation	Ensure the technical solution meets the objectives, through collaboration and user acceptance testing.			
7 - Help the Business Implement the Solution	Support the business stakeholders in making business process changes so that the solution ultimately delivers the intended result.			
8 - Assess the Value Created by the Solution	Assess the ROI (Return on Investment) of the delivered solution.			
Agile Business Analysis Concepts	Apply the business analysis process iteratively and effectively to collaborate with an agile software development team.			

ASSESSMENT OF TRAINING NEEDS AND DEVELOPMENT PLAN

Opportunities to Translate Informal Experience to More Formal Experience

Highlight opportunities to apply more formal tools, templates or techniques to solidify past transferable experience into a marketable business analyst skill. Often these will be the quickest wins for an aspiring business analyst, to gain traction quickly with a core set of business analyst skills. Formal training or 1-1 mentoring are both options.

Opportunities to Gain Initial Familiarity and Experience

Highlight opportunities to gain exposure to new concepts and start building experience. Often these tasks can be done first under the direct guidance of a senior business analyst, or as part of a formal training program that includes both training and skill application.

Opportunities to Gain Exposure to Additional Steps in the Business Analysis Process

Include opportunities to shadow or complete steps in the process that they have not seen before, or apply the steps in a project of increasing significance or stakeholder complexity. For example, going from discovering the business objectives from a single stakeholder to negotiating objectives from 3 or more stakeholders.

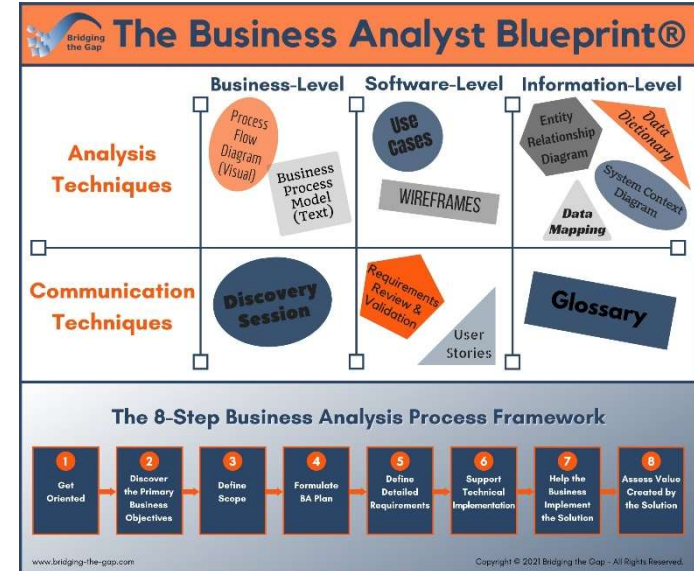

ABOUT BRIDGING THE GAP

Bridging the Gap provides practical, real-world, online training to help you become a confident, sought-after business analyst.

REAL-WORLD BUSINESS ANALYSIS TRAINING WITH PRACTICAL SUPPORT

The Business Analyst Blueprint® program is a 6-month comprehensive program in which you will organize your work, upgrade your skills, and bring a fresh perspective to your business analysis approach, so you know *exactly* what to do when on your software projects.

When you join The Business Analyst Blueprint® program, you'll receive real-world training in 12 industry-standard techniques and the business analysis process framework, along with practical help, so you can apply what you learn on-the-job and be more successful as a business analyst.
